PROFILE

6th semester Computer Science student who is enthusiastic about learning, with real experience in web and mobile development using modern stacks such as Laravel, Next.js, and Flutter. Ready to contribute and deepen my skills as a Full Stack Developer in a professional environment.

EDUCATION

S1 Computer Science

Universitas Pertamina | 2022 – Now (Third year, second semester)

PROJECT EXPERIENCE

Online Web Course (Laravel) | Backend Developer

Duration: 6 Months

- Develop back-end system using PHP (Laravel).
- Optimizing database performance for system efficiency.
- Implement CRUD operations and application business logic.
- Collaborate with front-end team for seamless user interface integration.

Voting Web (Next.js) | Full Stack Developer

Duration: 1,5 Months

- Design and develop a web-based voting system with Next.js.
- Build an efficient and scalable application architecture using Next.js features.
- Develop front-end using React and Next.js to support routing and server-side rendering.
- Manage data using Supabase with PostgreSQL database. Integrate Supabase API for real-time data retrieval and manipulation.

Financial Recording Application (Flutter) | Frontend Developer

Durasi: 1 Week

- Design and develop a mobile-based financial recording application using Flutter.
 - Implement data visualization features to provide financial insights.
 - Manage local data storage using Shared Preferences.
 - Create an intuitive and attractive user interface.
-
