PROFESSIONAL SUMMARY

Computer Science graduate from Universitas Pertamina focused on full-stack development. Builds frontends with React, TypeScript, Next.js, and Flutter, and backends with Express.js, Go, and PostgreSQL. Shipped production features as a Junior Software Developer at Universitas Pertamina and during an internship at PT Pupuk Indonesia. Works in Agile teams and applies MVC and Clean Architecture to keep systems maintainable and scalable.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, Java, Dart, C++, Python, Go
Frameworks: Laravel, Next.js, Flutter, Tailwind CSS, React.js, Express.js
Tools: Git, MySQL, Postman, Supabase, PostgreSQL

WORK EXPERIENCE

Software Engineer Intern, PT Pupuk Indonesia (Persero)

Sep 2025 - Jan 2026

- Migrated the Travel module from a Laravel monolith to a microservices architecture using React and Golang, working within a team of 7 engineers and 2 interns.
- Designed and built 4 REST APIs for the PTKP (Penghasilan Tidak Kena Pajak) feature on the employee web portal within one month, targeted for 2027 rollout to employees of PT Pupuk Indonesia and its subsidiaries.
- Collaborated with the backend team to refine API design and resolve cross-functional integration issues.

Junior Software Developer (Part-time), Universitas Pertamina

Jul 2025 - Jul 2026

- Built 12+ backend endpoints for the university's academic information system using Golang (pgx v5) and PostgreSQL, as part of an 8-person team with 3 interns.
- Developed the Adimas part-time job platform for university students using Next.js, Express.js, and MySQL, designed to reach the full active student population.

PROJECTS

VIOLIE, E-Voting System, HMIK Universitas Pertamina

- Built a secure e-voting platform using Next.js and Supabase for the Computer Science student association presidential election.
- Achieved 113 of 160 eligible votes, a 70.6% participation rate, with zero fraud incidents.
- Designed authentication based on university email domain and token verification to guarantee vote integrity.

badgPOS, Point-of-Sale System, Self Project

- Built a point-of-sale web app using Next.js with a companion cashier app in Flutter.
- Implemented table-side ordering via barcode scanning, integrated with the Midtrans payment gateway for table orders.

OLIVIA, Lost & Found Mobile App, Universitas Pertamina

- Led full technical implementation of a lost-and-found mobile app within a 5-person team where 4 members handled design, documentation, and testing.
- Built the frontend in Flutter using the BLoC pattern for state management, integrated with a Supabase backend for authentication, data storage, and real-time features.
- Implemented QR code verification and automated description matching to reduce false claims and speed up the item return process.

EDUCATION

Universitas Pertamina, Jakarta, Indonesia

Sep 2022 - Aug 2026

Bachelor of Computer Science, GPA 3.25/4.00

ORGANIZATIONAL EXPERIENCE

Staff, Project Development and Partnership Division, HMIK Universitas Pertamina

Jan 2024 - Jan 2026

- Developed web applications in response to requests from the Computer Science Student Association based on divisional discussion outcomes.

Public Relations Staff, CITE UP (Computer Information Technology Event UP)

Feb 2024 - Sep 2024

- Designed and executed a public communication strategy for a national tech event, coordinating media partners and alumni invitations.

CERTIFICATIONS & ACHIEVEMENTS

Code Generation and Optimization Using IBM Granite, 2025 - skills.yourlearning.ibm.com/certificate/MDL-566
